

ISO 27001 Foundation

Course Description

This course enables participants to learn about the best practices for implementing and managing an Information Security Management System (ISMS) as specified in ISO/IEC 27001:2013, as well as the best practices for implementing the information security controls of the eleven domains of the ISO 27002.

Course objectives

The ISO 27001 Foundation Course provides dynamic learning experience where learners can explore foundational knowledge of Information Security management.

This course is designed to provide insight into the ISO 27001 standard, and covers:

- Elements and operations of an Information Security Management System (ISMS)
- The correlation between ISO/IEC 27001, ISO/IEC 27002
- The approach, methods and techniques used for the implementation and management of an ISMS

The course includes:

- Course reference manual containing copy of course slides, support documents, quizzes and answers
- Course Certificate

Audience

The Course has been designed for Individuals involved in Information Security Management, Individuals seeking to gain knowledge about the main processes of Information Security Management Systems (ISMS) and Individuals interested to pursue a career in Information Security Management

Prerequisite

There are no formal prerequisites.

Duration
